

From the Editor's Desk

The Informant is always looking for input to pass on to the membership and those on our distribution list. If you would like to contribute an article, please submit to kenfreeman49@gmail.com. I am also looking for photos to go with your article. We are also looking for business cards to advertise in the Informant for \$25.00.

You may look at past issues of *The Informant* on our website www.mccaaa.org. There is lots of information on our website thanks to our webmaster Walt Houser. You may pay your 2026 dues in person or at one of our meetings. Please go to our website and print the membership application and fill out and mail to the P.O. box on the form.

Thank you

President's Remarks

Winter Issue

Montgomery County Citizen Academy Alumni Association

I want to thank the membership for continuously supporting the Alumni Association. If you have not been to a meeting in a while, we would love to see you. We welcome new suggestions for a speaker; please email our Program Officer Vivian Wolpers at mylighthousebysea@yahoo.com. The Association wants to bring interesting speakers to our meetings and it takes the membership to make suggestions. The better the speaker and topic will bring more attendance to our meetings.

I am going to get back to contacting service organizations such as Rotary, Kiwanis, and Lions clubs, the Izaak Walton League, Moose and Elk lodges, and veteran organizations to talk about the Citizen Academy. I also want to head back to the Olney Farmers Market in the spring with volunteers to work shifts, and I look forward to going to the National Night Out in Olney. I will apply early to the sponsor, the Olney Chamber of Commerce, to get a better location near District 4 and the Sheriff's Department.

The MCCA AAA wants to welcome our new leader of the Citizen Academy: PO3 Prince Starks-Bey. I emailed a welcome letter and what the association does to support the MCPD. The Alumni Association can't be more thankful to Sergeant John Mullaney for all his support and wish him the best in his retirement.

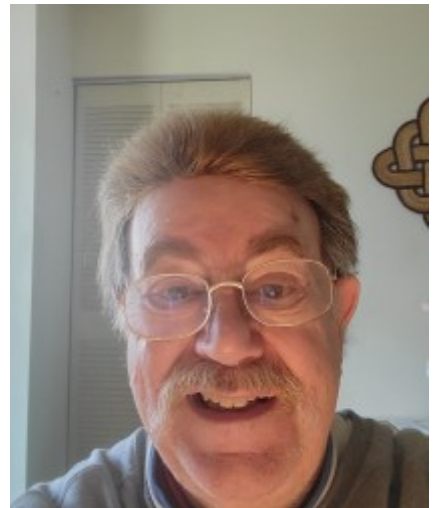

We will have our next social in January 2026, details to follow later. If you have not been to a social, we would love to have you.

We will be attending Session 77 Citizen Academy graduation with 27 graduates on December 23rd at the PSTA. We will also be supporting the young men and women from the MCPD on January 9th at a luncheon, on their successful new careers as members of the MCPD.

Respectfully submitted

Ken Freeman

Insider Risk

by Tamal Bhattacharya

Insider risk cases are often reported in the news, showing how the witting or unwitting actions of insiders, such as employees, result in adverse impacts to an organization. These impacts include data loss, loss of proprietary information, financial loss, reputational damage, and lawsuits, among others. Such affected organizations are in government, industry, academia, law enforcement, the military, and even professional sports.

Let us start with who is an *insider*? An insider is a person who has access to an organization's resources. An insider can be an employee, contractor, vendor and/or third party that has access to such resources as personnel, facilities, information systems, equipment, and other assets. As cases show, witting or malicious actions can include fraud, trade secret theft, criminal activity, espionage, sabotage or physical damage to assets, workplace violence, and hacking, among others.

What then is *Insider Risk*? It is the risk that an insider will wittingly or unwittingly use their access to take actions that can result in damage to the organization. For the purposes of this article, I am limiting this article only to the witting or malicious human insider risk. The U.S. Government and private industry use the term Insider Threat in a similar manner.

Our own Montgomery County Police Department (MCPD) states; "In cybersecurity, an insider threat refers to the risk posed to an organization's security and data integrity by individuals within the organization, parent organizations, and subsidiaries. Insiders can include employees, contractors, consultants, vendors, or business partners authorized to access sensitive information and systems."

Most individuals do not set out to become an insider risk.

Insider Threats:

<https://www.montgomerycountymd.gov/pol/fraud/insider-threat.html>

Most individuals do not set out to become an insider risk. A combination of factors including personal predisposition and life stressors in the home or on the job can lead a person down the road to becoming an Insider risk. What are Potential Risk Indicators (PRI)? Individuals who ultimately cause significant harm often exhibit warning signs or indicators. PRI include a wide range of individual predispositions, stressors, choices, actions, and behaviors. Some indicators suggest increased vulnerability to insider risk; others may be signs of an imminent and serious threat. Indicators do not always have diagnostic value or reflect wrongdoing. Some PRI may involve activities that are constitutionally protected. These indicators may include financial considerations, professional performance, criminal activity, computer activity, personal conduct, security or compliance incidents, foreign considerations, and substance abuse, among others.

Let's look at some Insider Risk Cases:

Justin Riggs case: According to the United States Attorney's Office of the District of Maryland and U.S. District Court of Maryland documents, Maryland State Police (MSP) Corporal Justin Ernest Riggs was assigned to the MSP Western Region Enforcement - Narcotics Section (MSP WRENS), investigating a Drug Trafficking Organization.

(continued on next page)

(Insider Risk, continued)

Riggs eventually contacted a drug distributor under investigation and started communicating sensitive investigative information in exchange for money between 2022 and 2023. A redacted affidavit stated Riggs had accumulated \$64,000 in debt, including credit card debt. In this case, the PRIs were financial considerations and criminal activity. Riggs pleaded guilty and was sentenced to federal prison.

Rita Crundwell case:

Rita Crundwell was the treasurer/comptroller of the City of Dixon, Illinois, from 1983 until April 2012, when she was arrested by the FBI. Over two decades, Crundwell siphoned off more than \$53 million of the city's funds using a secret bank account. At the time of her arrest, Crundwell's annual salary was \$80,000. During the two decades of the fraud, she purchased hundreds of horses, expanded her home, bought a home in Florida, and purchased several vehicles and motor homes. Among her purchases was a luxury motor home worth \$2.1 million. In this case, the PRIs were financial considerations (personal spending compared to earnings) and criminal activity (fraud). Crundwell pleaded guilty to wire fraud and was sentenced to 19.5 years in prison.

Christopher Correa

case: Correa was employed with the St. Louis Cardinals from 2009 to July 2015 and became the Cardinals' Director of Baseball Development in 2013. He provided analytical support to Cardinals' baseball operations. Correa was able to access a private online database called "Ground Control," which was used and operated by

An insider is a person who has access to an organization's resources.

the Houston Astros, by illegally accessing a victim's Ground Control and Astros email accounts. Correa accessed sensitive Astros information, including scouting reports and trade discussions, among others. In this case, the PRI was computer activity. The parties agreed that Correa masked his identity, his location, and the type of device that he used, and that the total intended loss for all the intrusions was approximately \$1.7 million. Correa pleaded guilty and was sentenced to 48 months in prison.

Vicky White case:

A recent Netflix documentary,

Jailbreak: Love on the Run, showed how and why Vicky White—the assistant director of corrections at the Lauderdale County Detention Center, who was much trusted, competent, experienced, and respected by her peers—aided and escaped with prison inmate Casey White, who was serving a 75-year sentence. The documentary illustrates PRIs that Vicky White demonstrated, including a romantic relationship with Casey White, a sudden retirement notice, selling her home underpriced, and conducting a “dry run” of the escape. The PRIs were personal conduct, security incidents, and financial considerations. Casey White was captured by law enforcement officers, but Vicky White died of a self-inflicted gunshot wound.

Many more cases can be analyzed as insider risk cases, such as the Chicago Police Department Sergeant Ronald Watts case, the Yu Xue and GlaxoSmithKline trade secret theft case, the Coinbase breach, the Major Nidal Hasan Fort Hood mass shooting case, and the Jared Ramos Capital Gazette shooting case.

Organizations should assess their organizational culture and implement insider risk programs

(continued on next page)

(Insider Risk, continued)

under the management of a senior official. These programs should include policies, procedures and authorities, reporting, information systems user activity monitoring, training and awareness, and intervention. They should also establish an

insider risk analytical cell/hub that involves, at a minimum, security, human resources, legal, IT, and threat analyst personnel, with procedures for referrals to local and national law enforcement agencies.

Timely and appropriate reporting of PRIs is crucial for assessing and mitigating insider risks. Preventing harm due to insider risk is a shared responsibility. If you see something, say something.

Tamal Bhattacharya

Membership Update & Thanks

As of January 1, 2026, the Montgomery County Citizen Academy Alumni Association has 53 members, and we're excited to see our membership continue to grow and stay involved during the year!

Thank you to the speakers

who have taken the time to join us and share their knowledge and experiences, and to the Montgomery County police officers who consistently support our association and serve the community. Your time and commitment truly make a difference! Stay safe as you start a new year of service.

We appreciate the continued involvement and look forward to another great year ahead!

Happy New Year 2026. Thank you!

— Missi Johns
Vice President, MCAAAA

MCAAAA Membership Renewal

If you have not paid your dues, you may send a check for \$15 with a membership application to our P.O. Box or pay your membership in person at any of our meetings. We are a 501(c)(3) non-profit organization. Please go to our website www.mcaaaa.org and print a Membership Form for application or renewal and follow the directions.

Member Spotlight: George Stimak

Where were you born? Raised? Schooling?

I was born in Brooklyn, NY, in 1949 and was raised there until I came to the Washington, D.C. area in 1971. I started school at PS-20 for grade K, then moved to a parochial school for grades 1-8, and to Bishop Loughlin Memorial High School that was operated by the Christian Brothers, graduating in 1967. My father was a commercial artist and my mother did various types of work on the home front, then post-war, ranging from airplane cable assemblies to Linotype machine components, but becoming a full-time housewife after I was born. We lived in a brownstone on Myrtle Avenue adjacent to the elevated line, and with streetcars running beneath the EL. That residence got slated for urban renewal demolition when I was three, and we relocated to a 15-story apartment building originally constructed for housing personnel that were working at the Brooklyn Navy Yard located a few blocks away. My father was one of 5 brothers; 4 served overseas during WWII, my father being in New Guinea at Port Moresby as an Army Signal Corps early air warning radar operator for about 3 years during the Papua New Guinea Campaign until he was evacuated back to the states due to coming down with malaria. My father attended Pratt Institute after the war, getting an associate degree in commercial art. He also had 5 sisters and he was from Binghamton, NY. My mother's family came to the US in 1929, she arriving with her mother and

older sister, while her father arrived a few years earlier. They resided in Port Dickinson, NY.

Did you attend College? Where? When? Degrees?

1967-1971: The Cooper Union School of Engineering and Science, New York, NY – awarded BEE Degree (Bachelor of Electrical Engineering) in 1971, 4-Year Tuition Free Scholarship to CU, also

held a NY State Regents Scholarship, inducted into HKN – Eta Kappa Nu Electrical Engineering Honor Society in 1971.

1971-1976: University of Maryland College Park, Clark Engineering School, awarded Master of Science in Electrical Engineering in 1976. Primary areas of study were control and communications systems. Work on the degree was accomplished

as a part-time student. In later years I was inducted into the Order of the Engineer, an academic professional engineering society.

1980-1983: University of Maryland College Park, Smith Business School, awarded Master of Business Administration in 1983. Primary areas of study were analytics, economics, strategic planning, marketing, and organizational design/management. Work on the degree was accomplished as a part-time student.

1990-2014: Defense Acquisition University – mandatory curriculum and course work yearly as a function of my position within the DoD as an Office

(continued on next page)

(Member Spotlight: George Stimak, continued)

of Naval Research Program Manager. Wide diversity of subject material including program analysis techniques, contracting, proposals and their evaluation process, line and matrix management, logistics, and ethics, to name a few. At the time of my retirement, I was certified as a DAWIA Level III Program Manager.

What career field do (did) work in?

I started with the Navy Department at the Naval Ordnance Laboratory, White Oak, in a full-time position as an electrical engineer within a week after my college graduation in June 1971. I worked in a branch with a mission area of defense against underwater weapons that exploited a target's underwater electromagnetic fields (signature), developing technology and systems to support Navy minesweepers and sweep systems, and during the Vietnam War on development of guidance parameters for helicopter Search and Rescue (SAR) of pilots that may have bailed out into an area that had been mined. I also developed the signature parameters for the guinea pig ship the US planned to use to

demonstrate that Haiphong Harbor had been cleared of mines to the North Vietnamese as part of the peace treaty agreement.

I progressed up the career track managing a section team on the design work for a new electromagnetic roll system to support minesweepers at Corpus Christi, TX. My career changed in 1985 by moving to the Navy Science Assistance Program (NSAP) as an Assistant Director where I worked on the full spectrum of technologies and problems of the Navy and the Marine Corps that might be rapidly addressed by an application of technology. I managed a multi-million dollar budget, and a field team of scientists and engineers drawn from the various Navy laboratories and warfare centers and university laboratories. NSAP involved me with a wide diversity of technologies – to cover a few – PSYOPS, training aids, human factors studies for operations in chemically dirty environments, laser eye protection, ASW, corrosion mitigation technology, drones, micro-drones, underway replenishment technology aids, and sports medicine for injury recuperation are a few examples.

In 1999 I was transferred to the

Office of Naval Research initially working the NSAP office that was relocated from NOL, and then later as a technology liaison officer between ONR and the Naval Sea Systems Command Program Executive Office (PEO) Aircraft Carriers. I was the Deputy Chief Technology Officer at the PEO and was involved in new construction, supporting existing ships, advising on general technology-related issues and being a conduit to draw upon support from ONR and the rest of the Navy's technology center community as required. In 2004 I returned to ONR and assumed duties as Program Officer for Underwater Electromagnetic Signatures. My job was to invest in Basic Research (Navy After Next), Applied Research (Next Navy) and Advanced Research (closer to Today's Navy). The planning horizon was from the now out to 25 or more years. I was involved with many different technologies – nanomaterials, superconductivity, 3-D printing of metal objects, electromagnetic launch systems, magnetic stress theory and prediction, computational software for hull EM performance, engine demagnetization and associated stability, advanced electric motors, EM hull shielding, corrosion detection sensors, grounding

(continued on next page)

(Member Spotlight: George Stimak, continued)

systems, and so on.

I resumed activities as Program Officer with meetings and programs involving NATO nations and Japan.

I retired the end of January 2014 after about 44.5 years of service. In the course of my career I was awarded a Meritorious Civilian Service Award, a Superior Civilian Service Award, and in 2009 the ASD&A Dr. Delores M. Etter Top Scientists and Engineers of the Year Award with the technology team I supported from the Navy's Philadelphia Laboratory in placing a distributed superconducting system onboard the USS Higgins (DDG-76). I really enjoyed my career as an engineer with the Navy. I got to see, do, travel and experience many things I could never have comprehended that I would be exposed to in my life, plus I had the opportunity to work with a number of true professionals in a number of fields.

<https://www.onr.navy.mil/media-center/news-releases/high-accolades-leadership-superconducting-degaussing-technology>

What is your favorite sport to watch? To take part in?

I like to watch football, my favorite teams being the Jets, Giants, and the Eagles. Besides football I occasionally watch golf and soccer. Australian Rugby caught my attention for its very fast pace. When young I used to be an avid baseball fan but with age my interests have changed. I never really participated in any organized sports. In my youth we had a number of friends and if we could get together about 8–12 guys we played street games – touch football, punchball, stickball, or if we could find a high wall we played handball. I played tennis with work colleagues and golf on NOL's 9-hole course on the front of the property. I really enjoy competitive air pistol shooting during fall, winter, and early

spring as an IWLAR Air Pistol League member. I find it to be a very challenging activity at my age. I enjoy fishing at the IWLAR lake as we stock it a few times each year.

What do you do in your spare time?

Lately it has been dabbling in trying to get two of my computers working correctly. I like to read usually items of history and science fiction. I like to follow news on TV and will read the newspaper occasionally. We subscribe to the Washington Post. I usually read the national and local news, Op-Ed, Letters to the Editor, and sports sections along with the Weekender and Health and Science sections. I retained membership and partake in lectures/webinars given by my professional engineering societies – Institute of Electrical and Electronics Engineers, Association of Naval Engineers, US Naval Institute, and US Army Association. My wife Sue and I are members of Smithsonian Associates, the Air and Space Museum Society, the National Archives Society, and the White House Historical Association.

For the Izaak Walton League of America Rockville MD Chapter, I serve as the Guest Speaker Chairman. Prior to COVID I was a STEM Volunteer at Northwood High School. Sue and I like to listen to Zoom lectures offered by the Smithsonian Associates, go on Recreation Department SOAR bus trips to historical sites, shows, or shopping expeditions. If I can find them I enjoy watching a good western movie on TV or in the theater; the same goes for sci-fi movies. After my retirement I took a course on Amateur Radio and received my license at the Technician Level and my Call Sign KC3LLJ. I am a member of the Green Mountain Repeater Association and enjoy their events.

(continued on next page)

(Member Spotlight: George Stimak, continued)

Tell us about your family.....spouse.....kids.... grandchildren...pets....

Sue and I met at a church dance in the late '70s; we married in 1980. We found that we had a lot in common – we are both from New York State, she from the Schenectady/Scotia area upstate, while I am from downstate; our fathers attended the same college, Pratt Institute, after WWII. Her father was an artist and developed designs for carpet patterns in his position with Mohawk. My father was an Art Director for Sperry Remington Rand Business Machines Division. We were both first born in our family and our personalities match very well. She was an elementary school teacher for many years and after retiring from that profession she became a certified water fitness instructor teaching water aerobics at the YMCA, Martin Luther King Pool, Leisure World and a number of other locations. She recently retired from that activity and has embarked on small ship cruising with her sister visiting – Alaska, Oregon, Washington, Maine, Charleston, Georgia, Florida, Netherlands, France, Germany, and Switzerland. She just returned from a trip to Iceland this past October to see the Northern Lights. Sue and I do not have any children. In my case my sister Anne Marie MacAulay who resides near Pittsburgh, PA, made up for that by having four and is now a grandmother to 7 grandchildren. Sue has allergies to fur so cats and dogs were out as pets, but we did have hermit crabs for a few years and as a teen I had an aquarium when I lived in Brooklyn, NY. Sue likes to write, has taken a

Program Officer's Report

Hello everyone

I hope everyone had a warm, safe, and happy New Year's celebration !

We had an excellent speaker/presenter in Captain Dave Reed, presenting on the subject of Water Rescue and Safety. We learned a great deal about what the MCPD trains its officers for.

In January, we will have the Natural Resources Police speaking to us.

I am waiting to hear back from my requests for February and March speakers.

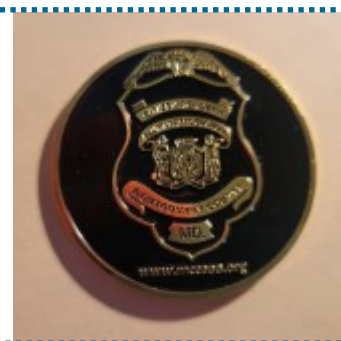

Take care and stay warm and healthy
Vivian

MCCAAA Challenge Coins

We have challenge coins that were made for the community and are available for \$10.00 each.

You can pay for them at any membership meeting.

number of courses in creative writing, and meets monthly with a friend and they write and critique vignette stories. She is also an avid photographer and scrapbooker with about 50-60 scrapbooks covering her teaching days, family vacations, special events, her years as President of the Burtonsville Garden Club, and her travels.

One thing we don't know about you?

I have a fascination with mechanical things and I used to enjoy when my Dad took me with him to pick up freelance assignments at the printer. The running presses with paper starting out at one end and ending up with printed material on the other could keep me visually occupied for a while. On the mechanical side I enjoy watching YouTube programs on how things work and how to do things. I watched a show the other day on the Whitworth Rifle that was invented in Britain by Sir Joseph Whitworth around the Civil War.

The rifle is unique in that it does not use a round ball or a Minié ball as the projectile but a hexagonal projectile bullet that fits extremely closely into its hexagonal barrel, along with a high rate of twist to the rifling giving the bullet a high rate of spin. The rifle had an effective range of 2,000 yards. That’s over a mile for a weapon of the 1860s! Equipped with a scope it was a deadly sniper weapon and the Confederates bought out the British production equipping their marksmen with this potent weapon.

Do you ever go to High School or College Reunions?

I have attended two high school reunions one being my 50th, and I have attended two reunions from Cooper Union. I enjoyed the ones that I attended. I keep in contact with two long-time friends who were classmates in elementary & high school.

Montgomery County Sheriff

Sheriff Maxwell C. Uy

Sheriff Maxwell C. Uy was elected as Montgomery County's 62nd Sheriff on November 8, 2022. He officially began his term on December 1, 2022. Sheriff Uy is the first Asian American to hold the Office of Montgomery County Sheriff.

Prior to his election, Sheriff Uy spent over two years as Chief Deputy, directing every aspect of the daily operations of the Sheriff's Office. During his law enforcement career, Sheriff Uy rose through the ranks, serving in nearly every section of the Sheriff's Office.

Sheriff Uy was raised in Fremont, California. Shortly after graduating high school, he enlisted as an active-duty member of the U.S. Army. He ultimately relocated to the East Coast as a member of the U.S. Army's Old Guard (3rd U.S. Infantry Regiment), before joining the Montgomery County Sheriff's Office as a deputy in 1994.

Sheriff Uy has extensive involvement in law enforcement policy making and professional organizations, including:

- Anti-terrorism Advisory Council (ATAC) Representative
- Awards Committee Member for:
- Maryland Sheriffs' Association
- Montgomery County Chamber of Commerce Public Safety Recognition
- Rockville City Chamber of

Commerce Public Safety Recognition

- Montgomery County Emergency Management Group (EMG) Member
- Montgomery County Opioid Intervention Team (OIT) Member
- International Association of Chiefs of Police (IACP) Leadership in Police Organizations (LPO) Instructor
- Crisis Negotiator Team (CNT) Member and Team Leader
- Special Events Response Team (SERT) Member and Team Leader

- Honor Guard Team Member and Commander
- National Sheriffs' Association Member
- Maryland Chiefs of Police Association Member
- American Legion Post 171 Member

Inside the Department

Winter Update from Nicholas Augustine, Assistant Chief of Police

I'm pleased to share the next installment of *Inside the Department*, keeping our alumni connected to the ongoing work, progress, and people of the Montgomery County Department of Police. Your dedication helped build the foundation we continue to strengthen, and it remains important to me that you are informed partners as the Department evolves.

New Officers Joining the Ranks

On December 11th, MCPD proudly graduated 23 new police officers from our Training Academy. This recruit class represents a diverse and highly motivated group, bringing fresh perspectives and a deep commitment to service. They will begin field training immediately and will soon be serving in districts across the county. Their success is a testament to the high standards set by those who came before them, and we are excited to welcome them to the department.

Holiday Alcohol Task Force

This winter season, the MCPD has launched its Annual Holiday DUI Task Force. There are officers and deputies from around the county participating to help keep the streets safe. This year, there are officers from Montgomery County Police, Montgomery County Sheriff's Office, Takoma Park Police, Maryland State Police, Rockville City Police, Gaithersburg City Police, and Maryland-National

Capital Park Police participating. Be safe this holiday season!

Renaming of the Volunteer Resources Section

To those who have continuously volunteered, thank you. In case you receive correspondence or want to proactively reach out, you may already know, but the section has changed its name to the Community Volunteer Section. Please stay connected with volunteer opportunities; we'd love to have you.

Finally, I want to extend my gratitude for the continued support and interest from our Citizen Academy Alumni Association. Thank you for staying connected. I look forward to providing more updates as we continue advancing the work and mission of the Montgomery County Department of Police.

Questions: If there are initiatives that you wish to have included in future updates of *Inside the Department*, please let your editor, Ken Freeman, know.

Police Water Safety Class

by Captain J. David Reed

MCPD, in partnership with MCFRS, has developed a Water Safety & Survival Class for MCPD and allied agency police personnel. It's common for law enforcement officers to be the first responders to water-related rescue calls. Given the responsibilities of the Behavioral Health Unit and MSOT, officers are frequently tasked with searching bodies of water for missing individuals. This class aims to equip officers with basic water safety skills and awareness of water hazards. The training will include practical exercises in a pool to boost officers' confidence in the water and provide them with the fundamental tools to carry out a rescue or supply specialized water rescue teams with high-quality information to support their operations.

Captain J. David Reed
Director, Training and Education Division

Citizen Academy

by Sergeant John Mullaney

Hello everyone. After 32 sessions of coordinating the Citizen Academy, I am finally turning over the reins to my successor, PO3 Prince Starks-Bey. Prince will take over all my roles effective January 1, 2026. He will still be using the Citizen.Academy@montgomerycountymd.gov email address, so feel free to reach out to him there. It has been a true pleasure to teach and work with each of you as we grew and fostered the relationship between the police department and the community. I could not have been successful in this role without the unwavering support of the MCCA AAA.

Session 77 is currently in the building, and 27 students will graduate 12/23. Session 78 will run from 01/06 to 04/21 and is still accepting applicants. If you have friends or family interested in the program, have them send in their application by email ASAP so we can enroll them.

Wishing you a safe and happy holidays!

Respectfully,

Sgt M

Thank you Sergeant John Mullaney! We wish you all the best!

Donations to the MCCA AAA

If you would like to make a tax deductible donation to the Montgomery County Citizen Academy Alumni Association, please make out a check to MCCA AAA and mail to our P.O. Box at:

MCCA AAA
P.O. Box 8884
Gaithersburg, MD 20898-8884

Thank you

Ken Freeman, President, MCCA AAA

Care For Cops

We have just about completed the Care for Cops Program. We have given goodie bags to all the patrol officers in the MCPD. The last district will be District 1 at Headquarters. We will deliver the bags to D1 as soon as we put them together. This has been a successful program for the MCCA AAA to support the MCPD.
